**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-40, drawn to device for drawing and depositing.

Group II, claim(s) 41-42, drawn to a control system.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The device of group II does not require any of the special technical features of group I. Group II does not positively claim any technical features or structure required of the device of Group I.

3. A telephone call was made to Clark and Brodie on January 15, 2010 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 1797

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

### ***Claims***

4. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

5. Furthermore, it should be noted that the claims of Group II are apparatus claims that are dependent upon method claims. The apparatus claims are not further limited by the method. Furthermore, it should be noted that the apparatus claims of Group II do not include transitional phrases as such it is unclear where the preamble of the claim ends and the listing of the elements applicant intend to define the control system begins.

6. Claims 41-42 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims 36 and 39 respectively. See MPEP § 608.01(n).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian R. Gordon whose telephone number is 571-272-1258. The examiner can normally be reached on M-F, 1st Fri. Off.
